sharing are key to delivering sustainable, high-quality projects. Events such as the ICE Awards provide an important platform to recognise excellence and inspire future progress, and we are proud to play a role in supporting this.

NTI Ireland

At NTI Ireland, we are proud to be an Autodesk Platinum Partner with over 30 years of experience supporting the Irish construction sector. As part of NTI Group, Europe's largest Autodesk Platinum solutions provider, we deliver the software, training, consultancy, and technology infrastructure that help construction teams work smarter, collaborate more effectively, and deliver projects with greater efficiency and confidence.

The ICE Awards represent exactly the kind of excellence we work to enable every day: projects delivered with precision, innovation, and integrity. Aligning with an awards programme that celebrates the very best in Irish construction was a natural fit for us. We believe the sector thrives when achievement is recognised and ambition is rewarded.

Sponsoring the ICE Awards has been a genuinely rewarding experience, an opportunity to connect with the people and firms shaping Ireland's built environment, and to play a small part in acknowledging their outstanding work.

Skillnet MMC Accelerate

The Construction IT Alliance (CitA) is Ireland's leading multi-disciplinary representative organisation focused on the digital transformation of the construction sector. Established in 2001, CitA provides a platform where industry, academia, technology providers, and government agencies collaborate to improve productivity, sustainability, and competitiveness through the adoption of digital technologies.

Over the past 25 years, CitA has delivered conferences, workshops, research initiatives, industry publications, technology demonstrations, and networking opportunities that have helped accelerate the adoption of Building Information Modelling (BIM), digital construction, automation, artificial intelligence, data-driven decision making, and more recently Modern Methods of Construction (MMC) across Ireland through our Skillnet MMC Accelerate National Initiative and successful Intleacht Series in 2026.

Today, CitA continues to support construction professionals and organisations by promoting best practice, fostering innovation, facilitating knowledge sharing, and helping develop the skills required for the future of the industry.

The ICE Awards celebrate the very best of Irish construction, recognising excellence, innovation, collaboration, and leadership across the sector. These values closely align with CitA's mission and

purpose.

As an organisation dedicated to supporting the future development of the industry, we believe it is essential to recognise and encourage the next generation of construction professionals who will shape Ireland's built environment. This is why we chose to sponsor the Future Leader categories in Architecture/Architectural Technology, Engineering, and Project Management/Surveying.

These awards provide an important platform to showcase emerging talent and highlight the skills, ambition, and leadership qualities that will be critical as the industry continues to evolve through digitalisation, sustainability requirements, and new methods of construction. Supporting these future leaders is an investment in the long-term success of the sector.

Our experience as a sponsor of the ICE Awards has been extremely positive. The professionalism of the judging process, the quality of the submissions, and the calibre of the finalists clearly demonstrate the strength and depth of talent within the Irish construction industry.

It was particularly encouraging to see so many young professionals displaying not only technical excellence but also leadership, innovation, collaboration, and a commitment to continuous learning. These are precisely the qualities that will drive the future success of the sector.

The awards ceremony itself provided an excellent opportunity to celebrate achievements, connect with industry leaders, and reinforce the importance of recognising excellence across all disciplines of construction.

2025/6 is a particularly significant year for CitA as we celebrate our 25th anniversary. Over the past quarter century, we have witnessed and supported enormous change within the construction industry—from the early adoption of digital tools to the emergence of BIM, Digital Twins, AI, automation, and Modern Methods of Construction.

Looking ahead, the industry faces exciting opportunities and challenges as it responds to housing demand, climate targets, productivity pressures, and workforce development needs. The future leaders recognised through initiatives such as the ICE Awards will play a central role in addressing these challenges and shaping a more innovative, sustainable, and digitally enabled construction sector.

CitA is proud to support and celebrate these emerging leaders and looks forward to continuing its collaboration with Irish Construction Excellence awards and the wider industry in the years ahead.

Autodesk Forma

In today's AECO landscape, disconnected workflows cause delays, overruns, and missed sustainability goals. Autodesk Forma transforms this reality by connecting planning, design, construction, and operations in an AI-native industry cloud - fuelled by predictive

intelligence - so teams collaborate seamlessly, anticipate risks, and deliver smarter, faster, and more sustainably than ever before.

Autodesk was proud to sponsor the ICE Awards, which celebrate excellence, innovation and achievement across Ireland's engineering and construction sectors. The awards showcase the individuals, teams and organisations driving progress and helping shape the future of the built environment.

Brian Roche, Senior Sales Specialist at Autodesk, said: "We were delighted to continue our support as Gold Sponsors for the 2026 ICE Awards. It is always an inspiring evening and an absolute privilege to stand alongside the companies and individuals who are driving the Irish construction industry forward—innovating at pace, embracing modern methods of construction, and delivering the sustainable infrastructure needed for a better tomorrow."

Construction Industry Federation (CIF)

The Construction Industry Federation (CIF) is the representative voice of Ireland's construction sector, supporting companies of all sizes across the built environment. We work with Government, policymakers and industry stakeholders to shape the conditions needed to deliver housing, infrastructure and sustainable development, while strengthening Ireland's economic competitiveness.

Alongside our advocacy role, CIF provides practical, business-critical supports to members, including training, health and safety guidance, industrial relations expertise, contracting and tendering, and market insights.

As a member-led organisation, we are focused on raising standards across the industry – from safety and skills to innovation and quality – ensuring construction is well-positioned to meet Ireland's long-term social and economic needs.

All services are provided on a national and regional basis from offices in Dublin, Cork and Galway.

Supporting the ICE Awards is a natural fit for CIF, as they shine a spotlight on the exceptional work being delivered across the industry every day. Irish construction is delivering high-quality, complex and innovative projects that are making a real difference to communities, the economy and the built environment.

The ICE Awards provide a respected platform to showcase this achievement – highlighting the skill, collaboration and professionalism that underpin successful projects. By supporting the awards, we are recognising the industry at its best and reinforcing the importance of excellence and continuous improvement across the sector.

It is also an important opportunity to celebrate the people and teams behind these projects, whose expertise and commitment

are driving the industry forward.

We are particularly proud to see so many CIF members recognised among the winners and finalists, reflecting the strength, capability and ambition of our membership. Congratulations to all those who were honoured on the night.

Our experience as a sponsor of the ICE Awards has been extremely positive. The awards process is robust and credible, and it highlights outstanding projects and teams from across the country. It reflects the diversity and capability of the Irish construction industry.

The gala night itself is a standout event in the industry calendar, bringing together leaders, innovators and emerging talent in a setting that celebrates success and fosters connection. There was a strong sense of pride in the room, and it provided a valuable opportunity to recognise the people and projects that are shaping Ireland's built environment.

As the representative voice of the sector, it is particularly rewarding to see so many of our members recognised - their success is a reflection of the strength and progress of the construction industry as a whole and the critical role they are playing in shaping Ireland's future.

At a time when Ireland faces significant challenges in housing, infrastructure and climate transition, recognising and promoting excellence in construction has never been more important. Initiatives like the ICE Awards celebrate the industry's achievements, highlight innovation, and demonstrate the critical role construction plays in delivering for society.

CIF is proud to support the ICE Awards as it champions the industry's achievements, and we look forward to continuing to work with our members and partners to drive progress, innovation and excellence in the years ahead.

Dulux

Dulux Paints is the leading supplier of quality interior and exterior paint products, operating in Ireland for over 140 years and part of AkzoNobel since 2008, a leading global manufacturer and distributor of paints and coatings for Residential, Commercial, and Industrial use. The Dulux Trade Ireland portfolio has a broad offering of high-performance products, which address the Irish construction industry needs for VOC Free and sustainable solutions ensuring award winning finishes to projects across Ireland. We are the leading innovator in this space with a dedicated Trade and Specification resource, collaborating closely with Architects and Construction

Dimitrios Avramidis, (Advent Risk Management) Andrew Hastings, (Allianz-Trade) Danny Rankin, Colm McGrath (Howden), Tom Johnson (Chubb), Sean Mulvey (BHSI), David Garrahan (Chubb) and Paul Wyse (Howden)
